Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 18 August 2003.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Indefinite Language

Regarding Claims 1 and 8, there is a mentioning of what happens when "pages" are received before a pre-determined period of time and "pages" received after a pre-determined period of time. However, there is no mentioning in either claim as to what happens in-between the pre-determined periods of time, and this renders the claims indefinite because it is unclear what the missing parts of the claimed invention are.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4-7 are rejected under 35 U.S.C. 102(e) as being anticipated by

Bruning (US Patent No.: 6989801B2).

*Regarding Claim 4, Bruning teaches of a system for capturing a digital presentation (**Figure 3B**), the system comprising:*

*a rasterized digital data source (presentation device 14 represents the rasterized digital data (data that can be projected on a projector) source, **Figure 3b and Column 6, Lines 36-56**) ;*

*a display (projection device 18 in **Figure 3b**); and*

*a storage device electrically connecting the rasterized digital data source and the display, such that rasterized digital data, transmitted from the digital data source to the display, is captured, converted into an application file format, and stored in the application file format by the storage device (Memory 21 is the storage device that is electrically connected to the presentation device 14 (rasterized digital data source) and the display (18) as shown in **Figure 3b**. A new image is created from the rasterized digital data (application file format) inside 18 and stored in the storage device 21,*

Figure 3b and Column 6, Lines 35-56).

*In regard to Claim 5, Bruning teaches of the system of claim 4, wherein the digital data source provides a rasterized streaming video data from a remote location (The digital data source 14 is located remotely from the display as shown in **Figure 3b**).*

*With regard to Claim 6, Bruning teaches of the system of claim 4, wherein the display is a video projector (The display 18 is a video projection device, **Figure 3b**).*

*In regard to Claim 7, Bruning teaches of the system of claim 4, wherein the digital data source is a computer (The digital data source 14 is a computer, **Figure 3b and Column 4, Line 10**).*

Allowable Subject Matter

Claims 1-3 and 8-14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
